Evidence & Verification Report

Manual Evidence Project

Analysis Period	2025-01-01 to 2025-12-31
Generated	2026-03-01T15:24:19.114030+00:00
Package ID	cdade4f9-aa8a-4ade-b68d-fcead8f830cc
Growth Status	GROWTH
Confidence Score	87.0 / 100
Overall Status	REVIEW_REQUIRED
Methodology	v0.1.0

1. Executive Summary

This evidence package documents the monitoring and verification results for **Manual Evidence Project** covering the period **2025-01-01** to **2025-12-31**.

Key Findings

Metric	Value
Growth Classification	GROWTH
Confidence Score	87.0 / 100
Overall Status	REVIEW_REQUIRED
Data Quality Score	79.1 / 100
Data Sources	1
Processing Steps	4
Verification Flags	1
Critical Flags	0

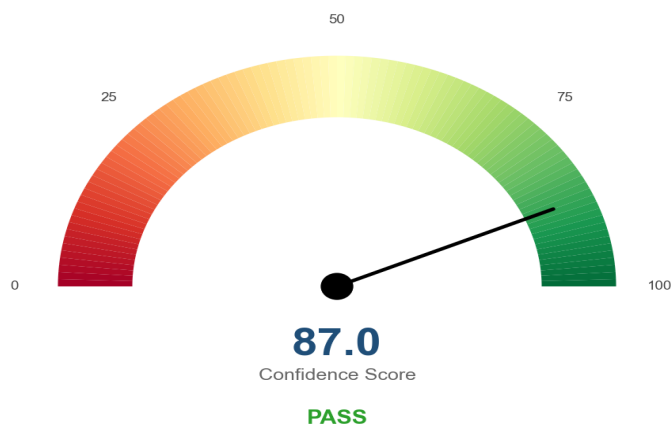

Figure 1: Confidence Score Gauge

Analysis of project 'Manual Evidence Project' indicates a 'growth' classification with 87.0% confidence. 1 verification flag(s) require attention.

2. Data Sources

Source	Platform	Collection	Resolution	Access Date
Sentinel-2 L2A	ESA Copernicus	COPERNICUS/S2_SR_HARMONIZED	10.0m	2026-03-01

3. Analysis Results

3.1 Extracted Features

Feature	Value	Unit	Uncertainty	Source
ndvi_mean	0.4200	index	0.0800	satellite_data
ndvi_min	0.3000	index	—	satellite_data
ndvi_max	0.5500	index	—	satellite_data
trend_slope	0.0003	index/day	—	calculation
slope_per_year	0.1100	index/year	—	calculation
seasonal_amplitude	0.1800	index	—	calculation
biomass_mean	42.0000	t/ha	8.0000	ml_model
total_observations	12.0000	count	—	satellite_data

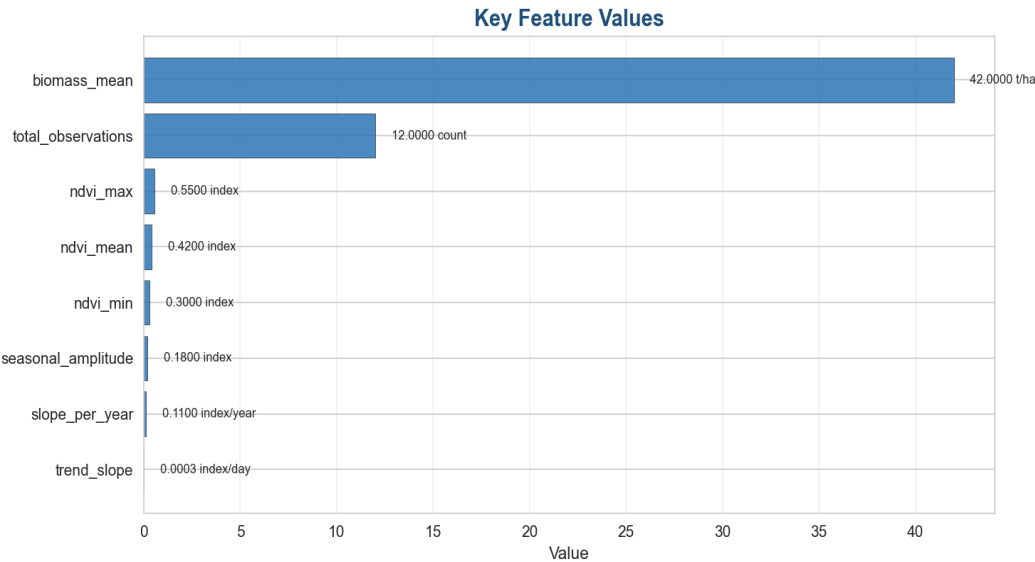

Figure 2: Key Feature Values

3.2 NDVI Time Series

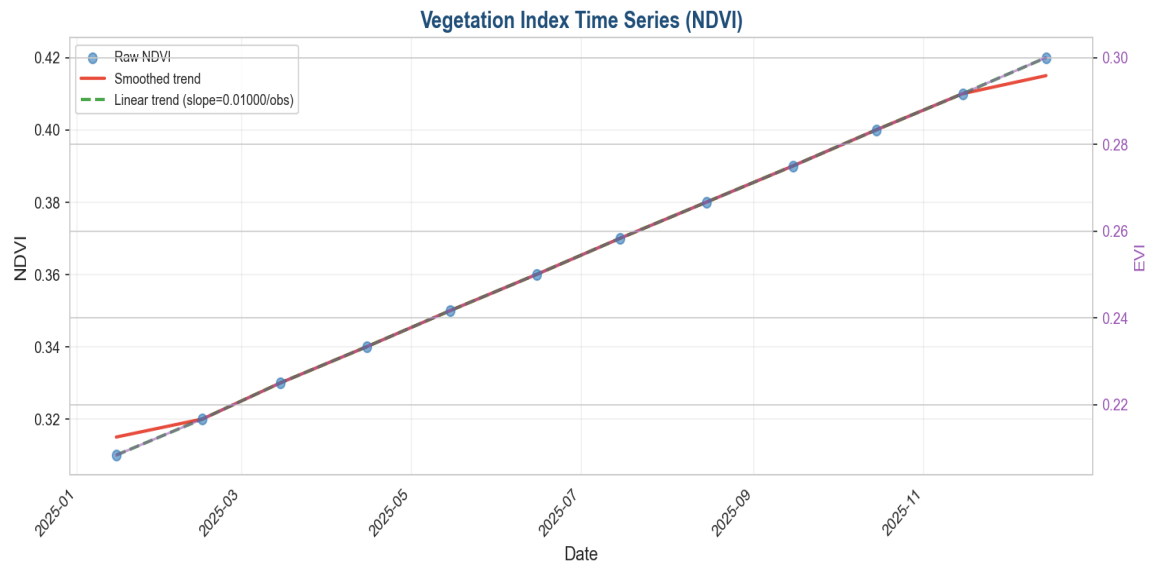

Figure 3: NDVI Time Series with Trend

3.3 Seasonal Pattern

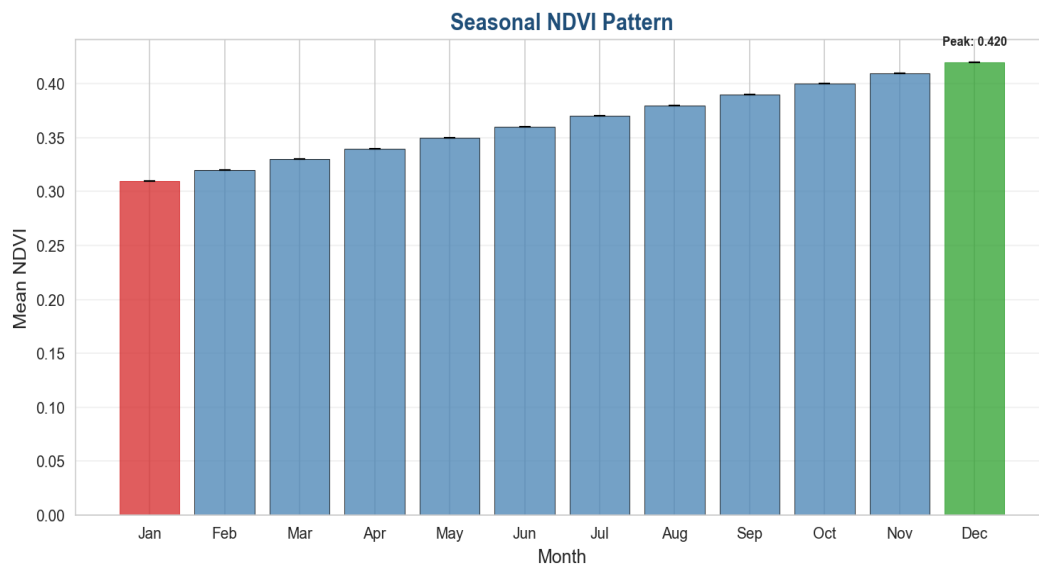

Figure 4: Monthly Seasonal NDVI Pattern

4. Verification Results

1 verification rule(s) evaluated. 1 flag(s) raised, including 0 critical.

Rule ID	Rule Name	Status	Risk Level	Recommendation
R3	Anomalous NDVI Spike	FLAG	MEDIUM	Review

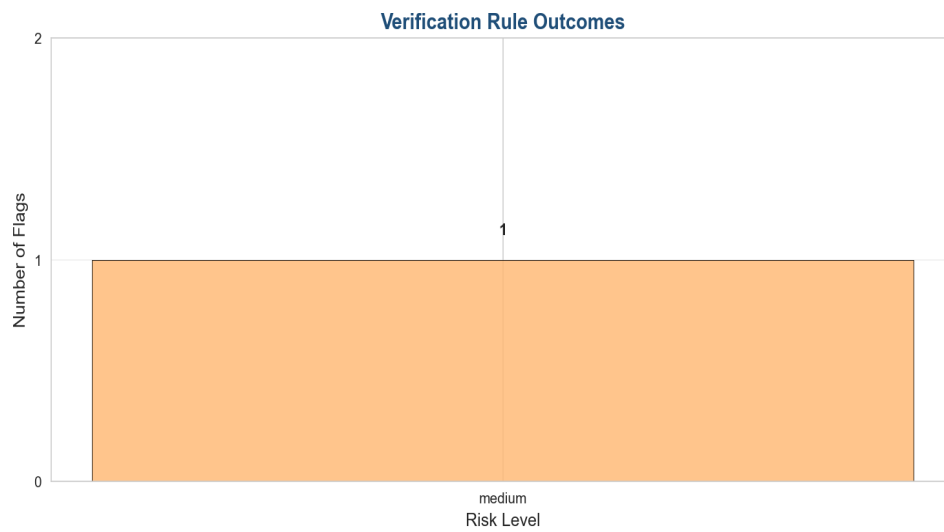

Figure: Verification Flag Distribution

5. Processing Lineage

Complete processing chain for full transparency and reproducibility. Each step is logged with timestamps, parameters, and status.

Step 1: Satellite Data Fetch

Timestamp	2025-06-01T10:00:00
Status	SUCCESS
Duration	1500 ms
Script Version	0.1.0
Parameters	end_date=2025-12-31, collection=COPERNICUS/S2_SR_HARMONIZED, start_date=2025-01-01

Step 2: Feature Extraction

Timestamp	2025-06-01T10:05:00
Status	SUCCESS
Duration	900 ms
Script Version	0.1.0
Parameters	end_date=2025-12-31, start_date=2025-01-01

Step 3: ML Scoring

Timestamp	2025-06-01T10:10:00
Status	SUCCESS
Duration	450 ms
Script Version	0.1.0
Parameters	model_version=biomass_v1

Step 4: Verification

Timestamp	2025-06-01T10:15:00
Status	SUCCESS
Duration	300 ms
Script Version	0.1.0

Appendix: Package Metadata

Field	Value
Package ID	cdade4f9-aa8a-4ade-b68d-fcead8f830cc
Project ID	fbedd2cd-a886-41e6-ac34-23dbeb9ed900
Analyst	GeoMRV Automated Pipeline
Methodology Version	0.1.0
Data Quality Score	79.1
Checksum (SHA-256)	befa18cdf5c667fe9d26370011083596613bb52dec5c1479c56a91692c78d279
Overall Status	REVIEW_REQUIRED
Generated Date	2026-03-01T15:24:19.114030+00:00

This report was generated automatically by the GeoMRV pipeline. All data, processing steps, and verification results are fully traceable. The SHA-256 checksum can be used to verify package integrity.
